Coding for SLPs

Skilled Commercial Insurance and PDPM Part A payers:

- Medical and treatment diagnosis can be the same, e.g., if you picked R13.12 and R41.841 for your treatment diagnosis, they should also be your medical diagnosis (the IDT team collaborates to decide the primary diagnosis in their meetings, this does not need to be on your evaluations)

Medicare Part B, Managed Care Part B, Medicaid payers:

- Choose the medical diagnosis that best supports the condition for which we are treating the patient- what is the reason we are treating them, the underlying medical condition that contributes to our treatment. For example, if treating cognition/speech this could be CVA, acute respiratory failure, COPD, dementia to name a few; for dysphagia it could be late effects COVID/CVA, Acute respiratory failure, adult failure to thrive, dementia to name a few. The only medical diagnosis for ST that we can use for medical, and treatment is dysphagia (R13.12 or any version of that code); R41.841 cannot be used as a medical diagnosis. In addition, the "I" codes related to CVA are mixed codes and can be both medical and treatment code.

If no medical diagnosis exists, write the treatment code in the medical code spot and then have someone on the team query the MD prior to triple check.

Common CPT Codes:

Evaluation Codes:

- 92523- eval code for speech/language
- 92610- eval code for dysphagia

Treatment Codes

Generally, speech codes are service based and untimed.

- 92507- Speech Therapy-Treatment of speech, language, voice, communication, and/or auditory processing disorder.
- 92526-Oral function therapy-treatment of swallowing disorders
- 92508- speech and language group
- 97150- group therapeutic procedures (for dysphagia group if MAC allows in your region)
- 96125- cognitive assessment code; On day(s) following initial evaluation, administer full assessment such as RIPA, CLQT, FLCI, etc... Test, scoring and interpretation time all billable time under Medicare Part B; Must be at least 31 minutes (see flow chart)

For other codes and more information, refer to Postette- SLP Logging Minutes
