ONE Clinical Fall Prevention Protocol

POSSIBLE F-TAG/QMS

F Tag 689 - Federal Tags (F Tags)

- Environment remains as free of accident hazards as is possible
- Each resident receives adequate supervision and assistance devices

Quality of Life

- ADL Dependency
- Urinary Incontinence
- Abuse and Neglect

Pharmacy

- Drug Regimen is Free from Unnecessary Drugs
- Free from Unnecessary Psychotropic Meds/PRN Use

Quality Measures

- Fall with Major Injury
- Locomotion Worsened
- Facility is free of restraints

THERAPIES

- PT
- OT
- ST

PURPOSE OF THERAPY

- Reduce environmental contributions to fall risk and maximize safety strategies.
- Improve balance reactions and stability with OOB tasks. Improve use of call light and enhance communications strategies to convey resident needs.
- Identify root cause of fall risks for individual residents.
- Staff training and education to ensure carryover of implemented strategies to minimize fall risk.
- Identify meaningful activities of choice to improve engagement and reduce wandering and risk of falls.

GOAL EXAMPLES

PT/OT:

- Pt will utilize call light __/3 times to request staff assist for ADL needs.
- Pt will attend to visual reminders ___/3 times to reduce independent attempts getting OOB.
- Pt will sit unsupported at EOB 5 minutes without LOB to reduce risk of falls in room.
- Pt will improve modified functional reach to ____ inches to improve ability to reach for ADL items without falls at EOB.
- Pt will reduce 5 times sit to stand score to ____ seconds within norms for age range in order to improve strength for transfers with Min assist.
- Pt will improve transfers to _____ assist with 25% multi-modal cues with prescribed assistive device.
- Pt will identify __/3 safety hazards in room with 25% verbal cues.
- Pt will engage in standing tasks including weight shifting and reaching outside base of support with Fair+ balance to reduce LOB during functional tasks.

TOOLS &ASSESSMENTS

Use of standardized/evidence based testing, such as:

- **Fall Risk Tests:**
  - TUG Test
  - 30 Second Sit to Stand Test
  - 4-Stage Balance Test
  - Orthostatic Blood Pressure Test
- **Strength and Muscle Performance:**
  - Chair Rise Test
  - Getting up from Lying on the Floor Test
  - Aerobic Capacity
  - 6 Minute Walk Test
  - Seated Step Test
- **Gait, Locomotion, Balance & Vestibular:**
  - Berg
  - Timed Up and Go (TUG)
  - Functional & Modified Functional Reach Test
  - Range of Motion Test
  - Chair, Sit and Reach Test
  - Dizziness Handicap Inventory (DHI)
  - Sensory Interaction – Foam & Dome
  - Falls Efficacy Scale / Confidence Index
  - Dynamic Gait Index
  - Physical Performance Test
- **Cognitive:**
  - Allen Cognitive Levels
  - Montreal Cognitive Assessment (MoCA)
  - Cognitive Performance Test (CPT)
  - St. Louis University Mental Status Exam (SLUMS)
  - Cognitive Linguistic Quick Test
- **Otago Fall Prevention Program (requires certification):**
  - 52 Week Exercise Prescription
  - Series of 17 Strength & Balance exercises

POSSIBLE F-TAG/QMS	THERAPIES	PURPOSE OF THERAPY	GOAL EXAMPLES	TOOLS &ASSESSMENTS

			ST:
			• Pt will utilize visual aides for call light assistance with min cues provided during transfers in 10/10 attempts in order to decrease risk for falls.
			• Pt will recall 4/4 safety precautions during transfers with min cues provided in order to decrease assistance required for functional activities and decrease risk for falls. --Pt will identify safety hazardous in room with min cues provided at 90% accuracy in order to decrease risk for falls.
			• Pt will accurately sequence safety steps during transfer with min cues provided at 90% accuracy in order to decrease risk for falls.
			• Pt will sustain attention to relevant task with min cues provided for a maximum duration of 5 minutes in order to follow instructions for safe ambulation and transfers to decrease risk for falls.
			• Pt will accurately follow 3-step commands provided min cues at 90% accuracy in order to increase safety during functional activities and decrease risk for falls.
			• Pt will accurately complete 3-4 step commands utilizing errorless learning techniques in 5/5 attempts in order to decrease risk for falls.
			• Pt will identify safe footwear in specific environments provided min cues at 90% accuracy in order to decrease risk for falls.
			• Patient will complete short term memory and delayed recall tasks with 80% accuracy and minimal verbal and visual cues to improve orientation, decrease fall risk, and decrease behaviors and anxiety related to forgetfulness.
				Use of standardized/evidence based testing, such as:
				• **STEADI Initiative:**
				  • Contains the three core elements of screening, assessing, and implementing interventions for fall risk reduction
				• **Sensory Impairment Intervention**
				  • Orthotics/ Shoe Modification
				  • Vision correction/ Visual Tracking
				  • Depth perception rehabilitation
				• **Urinary Incontinence**
				  • Toileting Program
				  • Pelvic Floor Rehabilitation/PTNM
				  • Assess Bathroom Set-up
				• **Pain management**
				  • Modalities
				  • Dry Needing, Cupping
				• **Balance Loss/Mobility Training**
				  • Resistance Training
				  • Balance activities
				  • Gait and agility training
				  • Assistive device training
				• **Vestibular**
				  • Assess for BPPV
				  • Static and Dynamic with eyes open/closed
				  • Balance pad with head movements or closed eyes to isolate vestibular reactions
				• **Positioning Impairments**
				  • W/C modifications, cushion/seating system
				  • Contracture management
				  • Anti-lock brakes, anti-tippers
				  • Integrating rest or movement periods out of chairs to avoid “slumping” and fatigue
				• **Cognitive Impairments: Safety awareness and Communication**
				  • Abilities Care Approach; reducing behaviors
				  • Heartmath: Heart Rate Variability Training
				  • Improving ability to express wants/needs
				  • Use of communication supports
				• **Environmental Modifications**
				  • Establishing visual contrast
				  • Rearrangement of furniture & removal of clutter
				  • Modification of the closet
				  • Lighting/Temperature
